Daily Skin Care System
For All Skin Types

GENTLE CLEANSER

SOOTHING TONER

COMFORTING CREME

NIGHT TIME SERUM

The Tamanu Organics Daily Skin Care System with Gentle Cleanser, Soothing Toner, Comforting Creme and Night Time Serum was designed for all skin types to gently cleanse, hydrate and replenish skin. Using the healing power of Tamanu Oil and other important botanical ingredients, Tavalava has created a masterpiece that works exceptionally well to produce beautiful and healthy skin.

Our impact ingredient, Tamanu Oil, has been used traditionally as a local medicine, and is considered the African, Asian, Polynesian and Pacific Rim panacea. The sacred Tamanu trees are ancient and native to Vanuatu, where they grow abundantly along the beach shores. In fact, Tavalava is the name of a village on the island of Vanuatu, where we source this incredible oil. The Tamanu nuts are harvested only twice a year after they have fallen to the earth. These nuts are left to cure naturally in the sun until they are collected and cold-pressed for their precious oil.

Science has shown that each drop of Tamanu Oil gently urges skin to rebuild and stimulates the growth of healthy, new skin tissue. This regenerative oil provides immediate relief to distressed skin and helps fight the body's inflammatory responses. Tamanu Oil can reduce the appearance of eczema, acne, and renew damaged skin. It moisturizes, nourishes, and repairs the skin. These miraculous benefits show why we've chosen to incorporate the exquisite Tamanu Oil into our formularies at Tavalava. The Tamanu Organics Daily Skin Care System is available in both Travel Kit and Daily Essentials Kit sizes.

GENTLE CLEANSER

Instructions for use: Use 1-2 pumps of Gentle Cleanser and apply to wet skin in a gentle circular motion. Rinse with cool to lukewarm water. Use twice a day, both morning and evening.

Ingredients: Aqua (water), Glycerin, Decyl Glucoside, Sodium Cocoyl Isethionate, Glyceryl Stearate SE, Disodium Cocoamphodiacetate, Glycol Stearate, Citrus Grandis (Grapefruit) Peel Oil, Aniba Roseodora (Rosewood) Oil, Limnanthes Alba (Meadowfoam) Seed Oil, Leuconostoc/Radish Root Ferment Filtrate, Fucus Vesiculosus (Bladderwrack) Extract, Algae Extract, Plankton Extract, Punica Granatum (Pomegranate) Seed Oil, Aloe Barbadensis (Aloe Vera) Leaf Juice, Tocopheryl (Vitamin E) Acetate, Caprylic/Capric Triglyceride, Lecithin, Xanthan Gum, Lactic Acid, Sodium Benzoate, Potassium Sorbate

MEADOWFOAM SEED OIL

Meadowfoam Oil contains over 98% fatty acids; it is high in triglycerides and long chain fatty acids. Due to the oil's unique chemistry, it provides emolliency without being overly greasy. When applied to the skin, it will form a moisture barrier to help prevent moisture loss. It can be used to reduce wrinkles and signs of aging.

ROSEWOOD OIL

A sweet, woody-floral fragrance with just a hint of spice. Rosewood is known for its ability to reduce inflammation and assist with overall skin health. Rosewood oil is good for all skin types. The molecules in rosewood oil promote tissue regeneration and leave the skin feeling clean, healthy, soft and glowing. Rosewood's Oil's cell stimulation and tissue rejuvenating properties make it a suitable oil to treat wrinkled, aging, mature, and compromised skin. Rosewood Oil is popularly known for its therapeutic properties and is known for its anti-depressant, slightly analgesic, aphrodisiac, antiseptic, antiviral, and stimulant properties.

LACTIC ACID

Lactic acid is one of the most popular alpha hydroxy acids (AHAs) in skin care today, marketed as a powerful ingredient that helps reduce acne breakouts and the appearance of wrinkles and other signs of aging. Lactic acid is a natural acid derived from milk, fruit, vegetables and other plants. It's found in over-the-counter skin care products used for anti-aging, and is also used in chemical peels. With a reputation for being gentler and less irritating than glycolic acid, it also hydrates, increases natural barrier lipids in the outer layer of skin, and lightens and brightens the look of skin for those with discoloration.

SOOTHING TONER

Instructions for use: Apply 2-3 pumps to a cotton pad and generously wipe face and neck. Can be used several times a day as needed to refresh and remove excess oil from skin.

Ingredients: Organic Aloe Leaf Juice (Aloe Barbadensis), Rose Esther, Witch Hazel Water (Hamamelis Virginiana), Rose Flower Water (Rosa Damascena), Glycerin, Organic White Willow Bark Extract (Salix Alba), Tea Tree Leaf Oil (Melaleuca Alternifolia), Polysorbate 20, Organic Alcohol, Tetrasodium Glutamate Diacetate, Saccharide isomerate, citric acid, sodium citrate, Daucus Carota Sativa (carrot) root extract

CARROT CELLS

Intact isolated cells of fresh carrot roots made from a specific enzymatic micro-dissociation process. Carrot cells are rich in hydro-soluble and lipo-soluble nutrients. They remain intact and visible even in complex formulations. Carrot cell suspensions have been shown to bring to the skin all the benefits of the original plants. They are very rich in mineral salts such as potassium and magnesium, oligo-elements and vitamins. Due to high beta-carotene content, the suspension provides significant antioxidant activity and assists with diminishing fine lines.

WHITE WILLOW BARK

White willow is the original or natural Aspirin and has nearly the same indications as for its synthetic counterpart. Where these two compounds differ though, are that white willow tends to be milder on the stomach lining than synthetic Aspirin and has a reduced anticoagulant action. This herb has been used for millennia for natural pain relief, reducing fever and inflammation, and recent studies are proving the traditional indications of white willow to be correct. The active compounds in white willow, called salicylate glycosides, work as an effective anti-inflammatory by interfering with pain transmission in the nervous system and by treating the cause of inflammation.

SACCHARIDE ISOMERATE

Saccharide Isomerate is derived from the D-glucose of wheat. Its composition is very similar to the moisturizing carbohydrate complex naturally found in the stratum corneum of human skin. Saccharide isomerate is an emollient (softens the skin). It has the ability to bind to the ϵ -amino group of lysine in the keratin of the stratum corneum, so it's not easy to wash off. Because of this, it keeps skin moisturized a lot longer than other emollients do.

COMFORTING CREME

Instructions for use: In the morning, apply a dime size amount of moisturizer to face and neck using upward circular strokes.

Ingredients: Water (Aqua), Organic Coconut Oil (Cocos Nucifera), Grapeseed Oil (Vitis Vinifera), Emulsifying Wax (Cetyl Alcohol, Stearyl Alcohol, Polysorbate 60), Stearic Acid, Glycerin, Xanthan Gum, Phenoxethanol, Tetrasodium Glutamate Diacetate, Tamanu Oil, Saccharide isomerate, citric acid, sodium citrate, Hydroxypropyl cyclodextrin, palmitoyl tripeptide-38, glycerin, Tocopheryl acetate

TRI-PEPTIDE 38

Anti-wrinkle, age-well peptide derived from the tripeptide KMK naturally found in collagen VI and laminin. In-vitro studies have found a matrikine-like effect that stimulates the synthesis of six major proteins including collagen I, II, IV, fibronectin, hyaluronic acid and laminin 5. It improves appearance of skin relief, fine lines, and wrinkles from the inside particularly on the forehead and crow's feet.

SACCHARIDE ISOMERATE

Saccharide Isomerate is derived from the D-glucose of wheat. Its composition is very similar to the moisturizing carbohydrate complex naturally found in the stratum corneum of human skin. Saccharide isomerate is an emollient (softens the skin). It has the ability to bind to the ϵ -amino group of lysine in the keratin of the stratum corneum, so it's not easy to wash off. Because of this, it keeps skin moisturized a lot longer than other emollients do.

COCONUT OIL

Coconut oil is a powerful moisturizer that is beneficial to restoring dry or flaking skin. Unlike your average moisturizer that contains a lot of water and likely synthetic ingredients, coconut oil helps to strengthen skin tissue more deeply and eliminate dead skin cells while absorbing quickly into your skin. Coconut oil also helps to delay the occurrence of wrinkles because it contains antioxidant Vitamin E, known to protect skin cells from damage over time. The Vitamin E found in coconut oil soothes eczema, sunburn and psoriasis, and its antiviral and antifungal benefits even help to treat bug bites. Coconut oil contains 3 fatty acids: capric acid, lauric acid and caprylic acid. Each of these acids kills candida, a common cause of fungal infection on your skin.

NIGHT TIME SERUM

Instructions for use: After washing with Gentle Cleanser and applying Moisturizing Toner, apply 1-2 pumps of Night Time Serum, gently pressing into the skin. Use once a day, in the evening.

Ingredients: Carthamus Tinctorius (Safflower) Oil, Simmondsia Chinensis (Jojoba) Oil, Camellia Sinensis (Green Tea) Oil, Oenothera Biennis (Evening Primrose) Oil, Calophyllum Tacamahaca (Tamanu) Oil, Rosa Canina (Rosehip) Fruit Oil, Hippophae Rhamnoides (Sea Buckthorn) Fruit Oil, Citrus Sinensis (Sweet Orange) Oil, Pelargonium Graveolens (Geranium) Oil, Boswellia Carteri (Frankincense) Oil, Styrax Benzoin Resin Extract

SEA BUCKTHORN OIL

Sea buckthorn contains vitamins A, B1, B2, B6, C, and other active ingredients. Its leaves and flowers are used for treating arthritis, gastrointestinal ulcers, gout, and skin rashes caused by infectious diseases such as measles. A tea containing sea buckthorn leaves is used as a source of vitamins, antioxidants, protein building blocks (amino acids), fatty acids and minerals; for improving blood pressure and lowering cholesterol; preventing and controlling blood vessel diseases; and boosting immunity.

FRANKINCENSE OIL

Frankincense oil contains a complex mixture of monoterpenes such as alpha-pinene, Limonene, alpha-thujene, and beta-pinene. Monoterpenes help prevent and discharge toxins from your liver and kidneys, and have antiseptic, antibacterial, stimulating, analgesic, and expectorant properties. The unique chemical constituents contribute to Frankincense oil's renewing effects when applied topically and ability to support diverse cells in the body when taken internally. The monoterpenes also contribute to the aromatic benefits of Frankincense oil, including its ability to promote relaxation and a sense of focus.

GERANIUM OIL

Geranium oil is antibacterial, antifungal, and antiseptic by nature. It averts the development of bacteria and fungi on wounds and injuries and safeguards you from infections. Geranium works as an immunity booster due to its antimicrobial effects. It strengthens the defensive cells of our body so that we can deal with various internal as well as external toxic challenges successfully. Being a styptic, it prevents the flow of blood by contracting our arteries and veins. Also, the hemostatic properties make the coagulation procedure faster and facilitate the clotting of blood. Both these properties are helpful in curing wounds and averting infections. Geranium oil is a powerful cicatrisant, and it helps in fading scars and spots, making them vanish with time. Moreover, the oil also helps facilitate blood circulation below the skin surface and helps promote uniform distribution of melanin.

BENZOIN EXTRACT

Prevents and heals cracking of skin, sores and stimulates secretions of enzymes and hormones like insulin from endocrinal glands like the pancreas, thus lowering the blood sugar level and regulating other metabolic functions. Its chief components are Benzyl Benzoate, Benzoic Acid, Benzaldehyde, Coniferyl Benzoate, Cinnamic Acid and Vanillin. This last component gives it a vanilla-like aroma. The health benefits of Benzoin Essential Oil can be attributed to its properties as antidepressant, carminative, cordial, deodorant, disinfectant, relaxant, diuretic, expectorant, antiseptic, vulnerary, astringent, anti-inflammatory, anti-rheumatic and sedative substance.
